

The Atomic Energy Society of Japan would like to thank the American Nuclear Society's generous gift of \$175,000. We appreciate your commitment with great sincerity to establish the Japan Relief Fund and to help people in Japan who suffered from the devastating earthquake and tsunami.

The ANS donation was used to purchase some stuff such as fruits and vegetables to refresh TEPCO's staff and workers who continues a strenuous efforts to settle the Fukushima Daiichi Nuclear Power Plants down into a stable condition.

Part of the funds is spent for the refrigerators to serve refreshments for emergency response workers at the Fukushima site, working in a harsh environment.
