Contribution to Neutron Nuclear Data Evaluation Newsletter-24

Japanese Nuclear Data Committee  
(Nuclear Data Center, JAERI)

Work recently completed:

Evaluation for 34 fission product nuclides has been completed. The evaluated data for them will be stored in JENDL-2. So, JENDL-2 will have the data for 67 FP nuclides. (from S. Iijima, NAIG)

Work in progress:

- i) Study on mutual consistency of the evaluated data for  $^{235}\text{U}$ ,  $^{238}\text{U}$ ,  $^{239}\text{Pu}$ ,  $^{240}\text{Pu}$  and  $^{241}\text{Pu}$  is now in progress. Selection of standard cross section is the central problem of this work. (from H. Matsunobu, SAEI)
- ii) Study on systematics of the nuclear model parameters is started as a part of the works in Working Group on FP Nuclear Data of JNDC. (from S. Iijima, NAIG).
- iii) Evaluation for  $^{245}\text{Cm}$  neutron nuclear data is now at final stage. (from S. Igarasi, JAERI).
